

INTENT

At Camblesforth Primary Academy it is our aim, in line with the National Curriculum, to develop the whole child and that our children will leave school with a love of PE, physical activity and sport. Children will learn life long skills such as collaboration, decision making, leadership and empathy and will go on to lead an active and healthy lifestyle. It is our intent to deliver a PE curriculum which is wide and varied, offering opportunities and trying to capture the imagination of every child in the school. At Camblesforth we also offer various physical activity challenges and school sports opportunities to help aid children's development in the four learning domains, physical, social, cognitive and emotional.

IMPLEMENTATION

At Camblesforth Primary Academy, PE lessons are fun and engaging and are taught through a variety of activities, topics and sports. Each class receives two PE lessons a week, taught by the class teacher or in correlation with the sports coach. Early years and KS1 focus on developing fundamental movement skills while in KS2 lessons start to become more sports specific, all the time looking to improve children's physical literacy. Knowledge is presented in a wide range of ways including specific 'Knowledge Organisers' that are used to reinforce and help improve children's understanding of the topics. Leadership skills are developed by training sports leaders to help with delivery and design of break/lunch time. Regular school activities and inter school competitions help nurture and encourage a love of sport, promoting a healthy competitive ethos. and after school activities.

IMPACT

At Camblesforth Primary Academy, the impact of PE is evidenced in a whole school display, pupil feedback and social media which all demonstrates various aspects such as enjoyment of PE, physical development and leadership skills. Children will have developed life long transferable skills, such as problem solving and decision making and acquired a love for being active and healthy.
